Dear Sir,

I am applying for the Java Intern Developer position that i have got through social media.

Your posted position requires some skills for the position. I have a good knowledge of Java including overall knowledge of Spring framework. I frequently solved problem on leetcode and have gained a good understanding over data structure and algorithms. Besides i have knowledge over OOP, basic idea on backend development, front-end technologies. I have used MySQL many time for my projects. I have also some basic idea of version control.

As i am passionate with Java language and problem solving with some of my other skills i think my carrier roadmap mathces your job requirements. I am also confident.

Thank you in advance for reviewing my candidacy for this position. I will wait to hear from you.

Sincerely,

Md. Shahriar Ahmed
